

Remarks

This is in response to the Office Action dated March 10, 2005. This Office Action allowed claims 4-14 currently pending, subject to the correction of various informalities in those claims. In particular, the Office Action first objected the specification at paragraphs [01] and [06] and requested that the patent applications identified by serial numbers in those paragraphs be updated to reflect the patent numbers corresponding to each of the serial numbers. The Office Action also objected to claim 6, indicating the word "us" should be changed to "is." The Office Action also objected to claims 7 and 10, indicating that the phrase "H.323 home gatekeeper" at line 11 of both of those claims should be replaced with the phrase "H.323 visiting gatekeeper." The Office Action also objected to claims 8, 9, 11 and 12, indicating that the term "associated" should be inserted in each of those claims immediately after the word "said" and prior to the phrase "home location functionality" in both line 4 and line 5 of each of those claims.

This amendment is being filed in order to incorporate the suggested changes, which were agreed to between Applicant's representative and the Examiner during a telephone conversation held on March 4, 2005. In particular, paragraphs [01] and [06] were amended to include the patent numbers and/or issue dates for each of the referenced patent applications in those paragraphs. Claims 7 and 10 were amended to correct a typographical error by replacing the phrase "H.323 home gatekeeper" at line 11 of both of those claims with the phrase "H.323 visiting gatekeeper." And lines 4 and 5 of each of claims 8, 9, 11 and 12 were amended to provide the proper antecedent basis to the terms of those claims by inserting the term "associated" immediately before the phrase "home location functionality."

These amendments were made only to correct the informalities identified in the Office Action. Accordingly, the scope of the claims has not changed and no new matter has been introduced as a result of these amendments. Applicant appreciates the recognition of allowable subject matter. Applicant respectfully requests all objections to the specification and claim be withdrawn and that claims 4-14 proceed to issuance.

Respectfully submitted,

David W. Herring
